A Couples Reading at the NC Museum of Art

## **Let your lip prints do the talking!**

Using Lipsology, Ariana gives people a way to look at themselves a little differently, creates a lot of fun and laughter, and gives your guests something to take home with them (their kiss card) to remember the great event they were at. It will create lots of buzz at your event (your guests will take their lip prints with them at the event and have even more fun telling others what their lip prints said about them).

**Entertain in unique style with Lipsology™**  
Lipsology is the art of reading personality traits and energy levels based on the shapes, lines, marks and color of an individuals lip prints.
